Enjoy The Freedom Of Home Automation - A UK First

In homes around the UK, disabled people are starting to enjoy the freedom that comes from a more independent living space built on our unique approach to the automation of their homes.

Imagine being able to do away with those many standalone gadgets? Well, advances in new technology mean that, with Commassist, you can design your own living space and have your home take care of the everyday tasks that eat into your time, energy and pocket, so you can spend more time on enjoying the things that bring you pleasure in life.

We radically improve the quality of your life using the most up-to-date, easy to manage, all-in-one, computer controlled technologies.

How Different Life Can Be With Commassist

Imagine the door bell rings and a small window pops up on your TV screen showing you the person at the door. You talk to the caller and you either press a button on your remote control or just tell the system to let them in. All from the comfort of your favourite armchair.

Life Made Easier AND Improved Security

Our unique Integrated Assistive Technology (IAT©) means you can interactively control everything and every room in your home.

And if you need things to happen automatically without your intervention, then that's okay too.

Leading The Independent Living Revolution

- ✓ **Environmental Health**
Monitors and reacts to issues concerning health, fire, distress, gas, water and falls.
- ✓ **Automated Doors**
Open and close your doors at home, in the office or remotely.
- ✓ **Automated Windows**

- ✓ **Automated Appliances**
Control your taps, drain plugs, stairlift, toilet flush, showers, cupboards, etc.
- ✓ **Complete InfraRed Control**
Manage any device that is controlled by Infrared Signals all from one device or by your own voice.

How Different Life Can Be With Commassist

If you are a wheelchair user, then having your doors automated would allow your doors to open automatically when you move towards them..

The Commassist Server may then also activate lights, curtains or blinds in that room, if the level of darkness has fallen below a certain agreed threshold.

Heating, TV or anything else you want can also activate if you require.

We can even adapt the systems ergonomic control to integrate many other forms of control; e.g. joysticks, blow switches muscular or head movement control etc.

Automating Your Home For The Freedom of Independent Living

✓ STEP 1: THE ASSESSMENT

The very first thing you need to do is contact us on the number below to arrange for one of our trained Consultants to visit your home accompanied by one of our Occupational Therapist if needed.

0151 728 7875

During our visit we will listen to what you need and provide you with helpful advice and suggestions on what can be done in your home. We will be able to quickly assess what needs to be done to automate your own home to meet your individual circumstances.

✓ STEP 2: THE REPORT

Following our visit you will receive a detailed Independent Living Assessment Report based on your needs to read over at your leisure.

✓ STEP 3: BOOK YOUR INSTALLATION

When you are completely happy with the suggested improvements, you simply call Commassist on 0151 728 7875 to arrange a convenient time for our expert installer to automate your home.

✓ STEP 4: INSTALLATION

Our professional installer will install the home automation system of your choice. Once the installation has been completed we will spend as much time as needed to make sure the system is working the way you want it and that you understand how to use the system. Along with a certificate of installation we will leave you with specific contact numbers should you require any further help and advice.

✓ STEP 5: ENJOY YOUR INDEPENDENCE

Now you can start to enjoy the freedom and independence of your new automated home with the peace of mind of total Commassist support for your system .
